

Cup Grinders

Cup Grinders are available in the following sizes:

- 100 mm
- 125 mm
- 180 mm

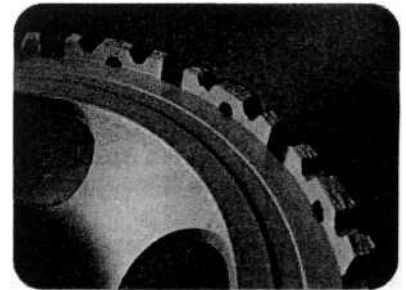

The Difference Factor:

Holer cup grinders feature very unique advances:

~ WM Shape Segment:

The unique shape of the segments enhances:

- Speed of grinding due to short surface contact
- Improved cooling & dust extraction for segment
- Reduced glazing effect on hard material

~ Bond & Diamonds:

Special bond and titanium coated diamonds contribute to:

- Significant increase in lifetime
- Allow a wider window of operation and tolerate a variety of material
- Better hold to bond to reduce diamond pull-out and enhance lifetime

~ High Quality Metal Body:

- Precision balanced body to provide even wear of cup
- Large holes to enhance dust extraction (**ACT** WM Series only)

Available Models:

Type	Grade	
BS	DIY	Bluestar spec for price conscious or occasional user
