The Terraflake System

Terraflake is a complete flooring system installed on site by Licensed Contractors to form a seamless, easily cleaned finish on your floor.

Two base coats are applied to the floor surface

Coloured vinyl flakes in the pre-formulated blend are scattered onto the second base coat before cure

After overnight cure the flakes are sealed with three layers of clear glaze for a hard wearing surface.

Licensed Contractor:

TERRAFLAKE

- Choose from this range of 16 attractive and practical colours, each available in fine flake or coarse flake finish, plus 9 colours in the new Microflake range.
- If you would like a special colour combination, consult your Licensed Contractor or a Nuplex Technical Advisor. They can provide other colour options to meet your decor requirements
- Note that the colours shown are reproduced as close as possible to the actual colours as the modern printing process will allow. We recommend you view actual colour samples with your licensed Contractor.
